Gentlemen:

Enclosed is a new Table III and IV to replace the one contained in the interlab 4 data set sent out April 12. The CO average for sample C7 is corrected from 14.6 to 16.7. The value was used for the CO graph was correct, so it did not change.

My spreadsheet used to calculate averages correctly even when the data was loaded from a Lotus file. Its latest revision now follows Lotus's rules exactly and counts cells which look empty, but contain an ASCII blank.

Sincerely,

William L. Steele
